

Assignment 4: **Text Generation (seq2seq modelling)**

Performance Analysis

Use the dataset Eng-Urdu translation, available on course eLearning with this assignment.

Using Google and Facebook translators, translate all the English sequences to Urdu sequencing. For each sequence, provide the corresponding ground truth (actual Urdu translation of English sentences) as reference translation and calculate BLEU score. Finally, for full dataset, calculate the average BLEU score. Write comments which translator performs better?

Repeat task 1 for ROUGE score
